Washington 25, D. C.

Loan and Power Use Memoranda #252

SUBJECT: Range Slidefilms

- ? The enclosed leaflet describes an inexpensive and excellent set of four slidefilms on the electric range. You will find this material useful with adults especially during the summer months and also all year round. During the school year, homemaking teachers may wish to borrow the set from you for youth work or adult meetings; and home agents may find them useful for leader training or youth and adult work. The slidefilms will provide your electrification adviser with program material for various types of meetings with rural women and girls.

Arthur W. Gerth
